DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-11 & 26, drawn to portable data collection unit for monitoring media selections, classified in class 725, subclass 18.
 - II. Claims 12-17, drawn to details of compression, classified in class 375, subclass 240.
 - III. Claims 18-24, drawn to setting parameters for a session with a remote computer host (synchronization), classified in class 709, subclass 228.
 - IV. Claim 25, drawn to details of a portable unit, such as activity modes classified in class 455, subclass 556.
 - V. Claims 27-36, drawn to details of correlating packets of feature waveforms, i.e. pattern matching, classified in class 725, subclass 19.

The inventions are distinct, each from the other because of the following reasons:

Art Unit: 2611

2. Inventions I-V are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility from inventions II-V such as a portable unit for monitoring a customer's selection of media content. Invention II has separate utility from inventions I & III-V as a compression algorithm. Invention III has separate utility from inventions I-II & IV-V for synchronizing portable units. Invention IV has separate utility from inventions I-III & V for controlling the activity modes of a portable unit, such as sleep or active modes. Invention V has separate utility from inventions I-IV for using correlation values for pattern recognition of an unknown packet with a known packet. See MPEP § 806.05(d).

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

4. A telephone call was made to Daniel Golub on 5/13/2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement may be traversed (37 CFR 1.143).

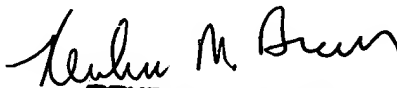

Art Unit: 2611

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Reuben M. Brown whose telephone number is (703) 305-2399. The examiner can normally be reached on M-F (8:30-6:00), First Friday off.
